

## TEC HINGES

**G\*GRASS®**

### TEC SOFT-CLOSE AND TEC SELF-CLOSE

TEC Face Frame Hinge System  
Established quality with functional benefits for today's  
modern cabinetry.

The perfect solution for your face frame cabinetry. TEC Soft-close, with an integrated soft closing action, and TEC Self-close hinge lines offer a complete range of quality hinges made in the USA.

The TEC hinge system offers a proven technology that makes TEC the first product choice among face frame hinge systems. Quiet and effortless closing action is guaranteed every time with TEC Soft-close hinges. Sleek in design, the Soft-close mechanism is pre-mounted in the hinge cup offering three levels of adjustment. TEC Soft-close and Self-close include 3-dimensional adjustment and a variety of overlays to meet your hinge needs. Made in the USA, TEC hinges are built to last.

## **TEC SOFT-CLOSE AND TEC SELF-CLOSE HINGE SYSTEMS**

Made in the USA, the TEC hinge systems offer a solution for every application in kitchen, bath, and residential cabinetry.

### **TEC Soft-close – the unique face frame hinge with adjustable soft-close action**

The TEC Soft-close hinge system is a revolutionary face frame hinge with the soft-closing mechanism pre-mounted into the interior of the hinge cup. An adjustment switch located on the face of the hinge regulates the closing action of the door. Integrated Soft-close combined with the adjustment feature provides functional benefits for today's modern cabinetry. Made in the USA, your doors will close softly, quietly, and consistently with TEC Soft-close.

### **Innovative 3-tiered adjustment**

TEC Soft-close hinges feature a 3-tiered adjustment switch enabling you to regulate the closing action of the door. These adjustments provide different levels of damping resistance in the soft-close mechanism. Set at the highest level, the damping system has the most resistance and provides the longest closing action. To achieve less resistance you can place the adjustment switch at the medium level or lower level. The settings can be different for each hinge on the door so that you can achieve the maximum benefit in your closing action regardless of the size or weight of the door.

### **TEC Self-close hinge system offers a solution for every cabinet application**

The TEC 860 family includes a variety of hinges with 3-dimensional adjustment to hinges used for MDF material. Each hinge is available in a variety of overlays and in an array of hinge and base plate versions. Constructed of all-steel and nickel-finish components for optimal strength and durability, the TEC hinge systems work on a variety of doors with profiled door edges. Made in the USA, TEC hinges are engineered to last.

# Features and Benefits

## TEC Soft-close

### Features

**TEC Soft-close** hinges are made in the USA of durable and long-lasting materials with time-tested design and manufacturing techniques. Every mechanism is tested for reliability and the user experience.

- One piece hinge and base plate combination
- 3-tier Soft-close adjustment
- 42 and 45mm boring patterns
- For face frame cabinetry
- Made in the USA

**TEC Soft-close** hinges are offered in these overlays:

1/4", 7/16", 1/2", 5/8", 3/4", 1", 1 1/4", 1 5/16", 1 3/8", 1 1/2"

## Features and Benefits

### TEC Self-close

#### Features

**TEC Self-close** hinges are made in the USA of durable and long-lasting materials with time-tested design and manufacturing techniques. Every mechanism is tested for reliability and the user experience.

- One piece hinge and base plate combination
- 42 and 45mm boring patterns
- For face frame cabinetry
- Made in the USA

**TEC Self-close** hinges are offered in these overlays:

$\frac{1}{4}$ ",  $\frac{7}{16}$ ",  $\frac{1}{2}$ ",  $\frac{9}{16}$ ",  $\frac{5}{8}$ ",  $\frac{3}{4}$ ", 1",  $1\frac{1}{4}$ ",  $1\frac{5}{16}$ ",  $1\frac{3}{8}$ ",  $1\frac{1}{2}$ "

# Technical Information

## TEC Hinges

### Technical Information

There are numerous variables that will determine the choice of hinge. Determine the requirements of the application.

Consider the following points based on the door to cabinet application:

Door overlay

Adjustment requirements:

- Height and side
- Height, side, and depth

Base plate mounting to face frame:

- Wrap-around - 3/4" thick frames only
- Side mount - frames thicker than 3/4"
- Face mount - any overlay greater than 1 7/16"
- MDF material - mounting into end grain

Door removal:

- With base plate mounting screw (one-piece hinges)
- With depth adjustment screw (two-piece hinges)

Door clearance/hinge arm clearance  
(for interior rollout trays)

Door gap  
distance between face frame and the back of the closed door

Minimum reveal  
distance between two doors hinged back to back

Door thickness  
thicker doors can restrict opening angle and minimum reveal

Hinge cup boring pattern for dowelled hinges

Door opening angle

Soft-closing or Self-closing

### Number of Hinges per Door

The number of hinges is determined by the door height, door weight, quality of the door material, and the fixing of the cup and base plate.

The load and height data refer to 24" standard door widths.

The table refers to hinges with and without integrated dampers.  
Grass strongly recommends a trial mount for all hinges and base plates.

Attach base plates using all available screw holes.

Example:  
For doors measuring 56" x 24" and weighing 19 lbs, Grass recommends the installation of 3 hinges.

**Note:** The distance between the top and bottom hinge must be greater than the width of the door.

The **TEC** hinge meets and exceeds the minimum requirements of ANSI/BHMA A156.9 Standard.

### Features

All-steel Construction

**TEC** hinges feature a solid metal hinge cup. All moving mechanism parts, including pivot pins, linkages and springs are hardened to ensure long-term durability.

Shallow Cup Depth

**TEC** hinges feature a shallow 11 mm (7/16") cup to accommodate profiled door edge. There are no protruding parts from the hinge cup.

Interchangeable

**TEC Soft-close** and **Self-close** have the same boring pattern so no change is necessary in your existing setup.

All-steel Construction

3-dimensional adjustment is built into the 864 and 872 hinge series.  
2-dimensional adjustment is available for 861 MDF and 863 hinge series.

Integrated Soft-close

The Soft-close damper is pre-mounted in the hinge cup.  
No additional installation of the Soft-close is required.  
A 3-tiered adjustment switch allows various levels of resistance in the damping system.

Made in the USA

**TEC** hinges are manufactured at the Grass facility in Kernersville, NC.

# Technical Information

## TEC Hinges

### Adjustments

TEC hinges offer a convenient 3-dimensional adjustment.

#### 1 Side Adjustment

Rotate cam adjustment screw.

#### 2 Height Adjustment

Loosen screw, align door, tighten screw.

#### 3 Depth Adjustment

Rotate cam screw.

#### 4 TEC Soft-close hinges offer an adjustable 3-tier closing mechanism.

##### Soft-close Tension

Light, Medium, and Strong settings

#### LIGHT

This is the "**LIGHT**" setting for the Soft-closing mechanism.  
Set here for light or small doors with very little closing pressure.

#### MEDIUM

This is the "**MEDIUM**" setting for the Soft-closing mechanism.  
Set here for average size doors with normal closing pressure.

#### STRONG

This is the "**STRONG**" setting for the Soft-closing mechanism.  
Set here for larger or heavier doors with a strong closing pressure.

##### (Factory Setting)

**Note:** To reset the Soft-close damper, move the adjustment switch to "**STRONG**", then to the desired position. Close the door and the Soft-close will be reset.

# TEC 864 Soft-close

108° Opening Angle - 1/4" to 1" Overlay

- Soft-close damper is pre-mounted in the hinge cup
- Adjustment switch to regulate closing action
- One piece hinge and base plate combination
- 3-dimensional adjustment
- 11mm (7/16") cup drilling depth
- Front locating tabs position hinge on face frame
- Cam side adjustment
- Cam depth adjustment
- Height adjustment at mounting screw
- Works with current GRASS insertion machinery
- Made in the USA

## Angle Reduction Clip

Description	Item No.	PU
85° Angle reduction clip	80125-42	100

Reduces opening angle to 85°

See page 27 for installation instructions.

PU - Packaging unit

## Dimensions - Door Closed

## Minimum Reveal

### TEC 864 Minimum Reveal

Door Thickness	16 (5/8")	17.5 (11/16")	19 (3/4")
Minimum Reveal	4.2 (5/32")	5.4 (7/32")	6.7 (1/4")

Based on door with square edge.

## Clearances - Door Open

Arm and door clearances see page 16.

## Adjustments

- Side Adjustment** +/-1.5mm (1/16")  
Rotate cam adjustment screw.
- Height Adjustment** +/-2mm (3/32")  
Loosen screw, align door, tighten screw.
- Depth Adjustment** +2.5mm (3/32"), -5mm (1/32")  
Rotate cam screw.

### Mounting Screws

Hinge cup to door, #6 x 5/8" Flat head screw

Base plate to face frame, #10 x 3/4" Pan head screw

## Overall Dimensions

## Base Plates

## Drilling Pattern

### 42mm Drilling Pattern

### 45mm Drilling Pattern

### IMPORTANT

To determine the correct application Grass strongly recommends a trial mounting for all hinges and base plates.

# TEC 864 Self-close

108° Opening Angle - 1 1/4" to 1 1/2" Overlay

- One piece hinge and base plate combination
- 3-dimensional adjustment
- 11mm (7/16") cup drilling depth
- Front locating tabs position hinge on face frame
- Cam side adjustment
- Cam depth adjustment
- Height adjustment at mounting screw
- Works with current GRASS insertion machinery
- Made in the USA

# TEC 861 for MDF Frame Material, Self-close

108° Opening Angle

- Patented wrap-around base plate prevents splitting of frame material
- One piece hinge and base plate combination
- 11mm (7/16") cup drilling depth
- Front locating tabs position hinge on face frame
- Works on frame thicknesses: 12.7mm (1/2"), 16mm (5/8"), and 19mm (3/4")
- Works with current GRASS machinery
- 85° angle reduction clip available
- Made in the USA

To determine the correct application Grass strongly recommends a trial mounting for all hinges and base plates.

# TEC 872 Self-close

110° Opening Angle

- 1/2" overlay achievable on profile door
- Available in 45mm boring pattern
- 3-dimensional hinge
- All metal construction, nickel finish
- Height adjustment in elongated screw hole
- Minimal gap between the door and frame
- Minimal protrusion into cabinet
- Hinge and base plate must be ordered separately

### IMPORTANT

To determine the correct application Grass strongly recommends a trial mounting for all hinges and base plates.

Soft-close for doors

- Works for face frame cabinets on all door overlays
- Works for frameless cabinets on full overlay doors
- Brushed nickel look blends in well with hinge finish
- Non-handed with a low profile design
- Manually adjustable to desired closing speed
- Mounts independently from the hinge in the upper corner of the cabinet
- Instantly allows the cabinet door to close quietly and smoothly
- Scratch protector and front bumper with cushion for a quiet close

Unisoft Adapter

Description	Material	Item No.	PU
Unisoft, Polybag	Plastic, chrome	18971-37	1
Unisoft, Polybag Bulk	Plastic, chrome	18971-40	25
Unisoft, Bulk	Plastic, chrome	18971-14	250

Includes #6 x 3/4 Pan head screw

Installation      Mounting Position      Adjustment

Use a 65° angle for best base results. Pilot drill 2.3mm (Ø3/32") and 1/4" deep for a #6 x 3/4" Pan head screw recommended. Mount in upper corner on hinge side.

**IMPORTANT** The installation of our cabinetry hardware must comply with the Grass instructions that are stated on this catalog page.

Turn adjustment screw to move damper in and out. Adjust in for heavier doors or out for light doors. Use Phillips or Pozidrive screwdriver or adjust manually.

Dimensions      UniSoft per Door

Use one UniSoft for most applications. For heavier doors use two or more. Trial mount recommended.

UniSoft    Hinges
