DIY (Do It Yourself) keys for static colors:
On the control panel, there are 3 groups of "Increase" and "Decrease" arrows for Red, Green, Blue colors, and 6 DIY color storing keys from DIY1 to DIY6. The 6 DIY keys are preset with standard mixed white color, end users can manual control its color of Red, Green, Blue, and store the desired color effect.

Operation steps:

First of all, choose the DIY key, for example "DIY2", that needs to be changed. Press the key DIY2 to get its mixed lights on. Adjust the brightness of its color Red, Green, Blue by pressing the relative arrows of "Up" and "Down" until the desired new mixed colors or single color are realized. Then press the key DIY2 again, the selected new light effect is stored there.
