

- For face frame cabinets (For any door overlay)
- For frameless style cabinets (Full overlay)
- Non-handed (Can be installed on left side or right side of cabinet)
- Sleek design with zinc diecast housing, blends in well with hinge finish

The soft close damper can be used universally in any cabinet construction.

## NUMBER PER DOOR

Use one soft close damper for most applications. For heavier doors use two or more. Trial mount recommended.

## ADJUSTMENT

Turn adjustment screw to move damper in and out. Adjust in for heavier doors or out for lighter doors.
